

Effective January 1, 2019, LabCorp will become a preferred national in-network provider of laboratory services for all commercial and Medicare **Aetna** members.

You have a choice about the laboratory you use in 2019.

Starting 2019, please send your **Aetna** patients' laboratory testing to LabCorp.

Start the review process

- Now is the time for you and your staff to think about how a single lab provider (LabCorp) can help make your practice run more efficiently.
- To begin this process, identify your Aetna patients to transition to LabCorp's collection and testing infrastructure in 2019.
- Ask your LabCorp representative to help your practice establish a streamlined lab service provider process.
- Learn more about how our new LabCorp Patient® mobile app can help your patients access test results online, schedule appointments for specimen collection and more; saving your office time with these questions.

LabCorp offers many service enhancements for you and your patients, including:

Comprehensive Test Menu

- Nearly 5000 frequently requested, specialty, and genetic tests, with an increased emphasis on precision medicine tests to help you provide more personalized care for each patient

Patient Convenience and Access

- Convenient, easy-to-use online and web-based tools to help patients make lab appointments, streamline the lab check-in process, obtain an advance estimate of out-of-pocket costs for their testing, access test results, and simplify billing and payment
- Expanded specimen collection locations, including a growing retail presence

Value-based Care

- Data tools to help your practice with value-based care and population health initiatives

Variety of Test Order and Result Delivery Solutions

- Simplified test orders and results through intuitive EHR interfaces, including access to historical test LabCorp results regardless of the ordering physician

Clinical Studies

- The opportunity for you and your patients to participate in clinical studies through our Covance business, helping to advance treatment of complex diseases and speed the delivery of new treatments to patients
